

AEROBATICS & SPINNING TRAINING ENDORSEMENT

TEACH AND TRAIN AEROBATICS AND SPINNING FLIGHT ACTIVITIES

#TheSkylsCalling
**PUSH YOUR FLIGHT
INSTRUCTING ENVELOPE**

In the Aerobatics & Spinning Training Endorsement course, you will learn how to teach students the fundamentals of performing aerobatic and spinning manoeuvres in our Super Decathlon aircraft.

The course focuses on delivering the **best practical methods for teaching manoeuvres covered in the Aerobatics & Spinning Endorsement course**, coupled with ground training that includes pre and post-flight briefing demonstration and read back.

To complete this course you must hold a PPL or CPL as well as an Aerobatics & Spinning Endorsement and Flight Instructor Rating.

TEACH STUDENTS HOW TO RECOVER FROM ANY SITUATION

Aerobatic and spinning training requires a strong understanding of aerodynamics, structural tolerances, and human factors like G-Loc and Red Out.

Under the guidance of expert instructors, you'll **learn how to teach the advanced aircraft control techniques** required during aerobatic and spinning manoeuvres. You'll also learn to be confident in teaching recovery from mishandled manoeuvres in a range of situations.

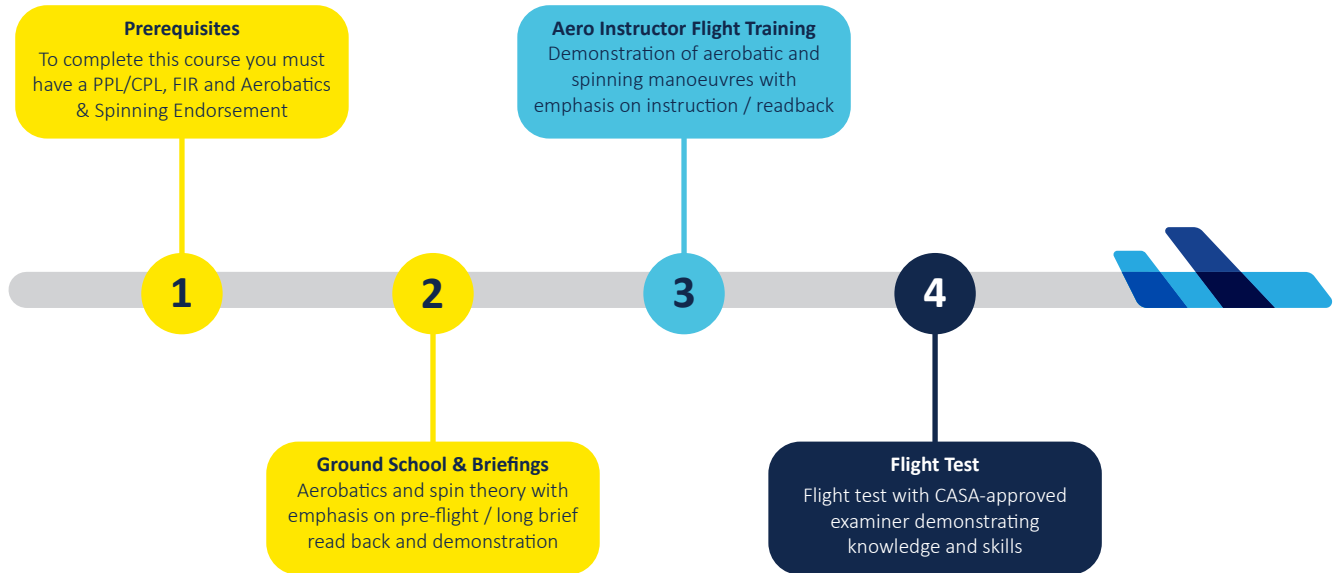

The tandem seating configuration of the Super Decathlon aircraft provides an extra challenge, and learning to instruct from the back seat will greatly improve your own confidence in your ability to teach by communication and feel.

OUR GRADUATE: SHANNON THIELE

“The Aerobatics and Spinning Training Endorsement is a valuable development tool for Flight Instructors as it teaches you how both the aircraft and the human body performs in dynamic flight situations. The LTF course is designed and facilitated by experienced instructors and completed in an aircraft that was purpose-built for aerobatic flight” – LTF Instructor Shannon Thiele
